

# Using AI in Assessment Integrating with GenAI

This is a side-by-side comparison of what teachers should and shouldn't do when integrating GenAI into student learning, to support responsible, ethical, and effective classroom use.

## DO's

Do teach students how to use AI tools responsibly and ethically.

Do encourage students to use AI for brainstorming, drafting, and revision.

Do emphasize critical evaluation of AI-generated information.

Do set clear guidelines on when and how AI can be used in assignments.

Do model responsible AI use in your own teaching to set clear expectations for students.

## DON'Ts

Don't assume all students know how to use GenAI effectively.

Don't punish AI use without prior education.

Don't allow students to submit AI-generated work as their own without acknowledgment.

Don't let AI replace students' own thinking and creativity.

Don't overlook the need to monitor AI use to prevent misuse or dependency.
